-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2614

1. Claims 7, 95 and 96 are objected to because of the following informalities: these three claims all introduce “*The* audio-video transmitting (receiving) apparatus...” which lacks antecedent basis since any such apparati have not yet been identified. (Applicant should notice claims 98-101 which all start with “*A* transmitting (receiving) apparatus ...” which presents the initial introduction definitely). Appropriate correction is required.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 7 and 95-101 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for embodiments viewed when interpreting the claim in the alternative only, does not reasonably provide enablement for the embodiment when the claimed features are all “anded” together, thereby forming all-inclusive data structures. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 and 95-101 are rejected under 35 U.S.C. 102(b) as being anticipated by

Kuriacose et al.

Art Unit: 2614

Interpreting independent claims 7, 96, 98 and 100 in the alternative sense (i.e. the “and/or” language of the claim requiring only one feature to be identified to meet the claim), Kuriacose (noting Fig. 1) discloses a transmitter and associated method, and a receiver and its associated method, for transmitting the content concerned with a transmitting method, namely an transmitter that includes an MPEG formatter for an A/V signal, and its receiver counterpart that receives and disassembles the MPEG stream, wherein the content concerned with the transmitting method results in designating the sequence of the IPB frames, thereby meeting claims 7, 96, 98 and 100.

As for claims 95, 97, 99 and 101, these claims are met because they recite features tied to an alternative embodiment recited in the respective base claims, those embodiments not being addressed since an alternate embodiment recited in the four base claims was addressed. Any further limitations of another embodiment are therefore not required to be addressed.
